

CodeAlpha C++ Internship

TASK 2: Login and Registration System

Complete source code for this internship task.

```
#include <iostream>
#include <fstream>
#include <string>
using namespace std;

bool userExists(const string& username) {
    ifstream file("users.txt");
    string u, p;

    while (file >> u >> p) {
        if (u == username)
            return true;
    }
    return false;
}

void registerUser() {
    string username, password;

    cout << "\n--- Registration ---\n";
    cout << "Enter username: ";
    cin >> username;

    if (userExists(username)) {
        cout << "Username already exists.\n";
        return;
    }

    cout << "Enter password: ";
    cin >> password;

    ofstream file("users.txt", ios::app);
    file << username << " " << password << '\n';

    cout << "Registration successful.\n";
}

void loginUser() {
    string username, password, u, p;
    bool found = false;

    cout << "\n--- Login ---\n";
    cout << "Enter username: ";
    cin >> username;
    cout << "Enter password: ";
    cin >> password;

    ifstream file("users.txt");

    while (file >> u >> p) {
        if (u == username && p == password) {
            found = true;
            break;
        }
    }

    if (found)
        cout << "Login successful. Welcome, " << username << "!\n";
    else
        cout << "Invalid username or password.\n";
}

int main() {
    int choice;

    do {
        cout << "\n1. Register\n2. Login\n3. Exit\n";
        cout << "Enter choice: ";
        cin >> choice;

        if (choice == 1)
            registerUser();
        else if (choice == 2)
            loginUser();
        else if (choice == 3)
            cout << "Goodbye!\n";
        else
```

```
        cout << "Invalid choice.\n";  
    } while (choice != 3);  
    return 0;  
}
```
